

Devlify

Freelance Web Developer

+234 903 430 3594 | contact@devlify.com.ng | github.com/devlify-marketplace | linkedin.com/in/sadiq-abdullahi | devlify.com.ng

SUMMARY

Freelance full-stack developer who takes real business systems from first client conversation through to live deployment — school portals, hotel platforms, e-commerce stores, and more. Delivers secure, production-grade systems independently, and also teaches web development, having mentored 1,200+ students through structured programming courses. Comfortable owning scope, timeline, and communication end to end.

EXPERIENCE

Full-Stack Developer — Freelance · Running Jack ICT Academy	2022 – Present
- Scoped, designed, and delivered production-grade business systems end to end for real clients, including school portals, hotel management systems, and e-commerce platforms - Managed full project lifecycles independently: requirements gathering, architecture, development, payment integration (Paystack), and deployment - Delivered ongoing maintenance and security hardening (CSRF, rate limiting, SSL) for live, in-use client systems - Taught structured web development courses to 1,200+ students while continuing to ship client work	

PROJECTS

School Management System (EduPortal)

Next.js · Node.js · PostgreSQL · Paystack

- Delivered a live, in-use SaaS platform serving multiple schools from a single client engagement
- Handled the full relationship: requirements, architecture, delivery, and ongoing support
- Integrated Paystack payments and role-based dashboards based on client and end-user needs

Hotel Management System (StayEase)

PHP · MySQL · Paystack

- Delivered a complete booking and guest-management system for a real, operating hotel client
- Integrated Paystack payments into the booking flow based on client requirements
- Continues to support and maintain the system in production

SKILLS

Languages: JavaScript, TypeScript, PHP, Python

Frontend: React.js, Next.js, Tailwind CSS, Bootstrap

Backend: Node.js, Django, Flask, PHP/Laravel

Tools & Deployment: Git/GitHub, Docker, Nginx, Paystack
