

SUMMARY

Full-Stack Developer and Computer Science undergraduate at Federal University Gusau with strong hands-on experience designing, building, and deploying production-grade web applications and backend systems. Skilled across the full stack — from responsive React and Next.js interfaces to Django/Node.js APIs and relational database architecture. Experienced in end-to-end delivery: architecture, UI, backend engineering, payment integration (Paystack), and deployment.

EXPERIENCE

Full-Stack Developer — Freelance · Open Source · Academic Projects · Running Jack ICT Academy

2022 – Present

- Designed and developed full-stack web applications using React.js, Next.js, Node.js, and PHP for clients and self-directed projects
- Built RESTful APIs with Django and Flask; implemented JWT authentication and secure session management with CSRF protection
- Architected and optimized relational databases using PostgreSQL and MySQL; implemented query optimization and integrity constraints
- Integrated payment systems (Paystack) across multiple platforms including school portals, hotel management, and e-commerce stores
- Deployed applications on Linux (Nginx/cPanel) environments; configured SMTP email, OAuth (Google), and SSL/HTTPS security

PROJECTS

School Management System (EduPortal)

Production-grade multi-school SaaS with student portals, result computation, fee payments via Paystack, and a role-based admin dashboard.

Next.js

Node.js

PostgreSQL

Paystack

- Built the full stack end to end: Next.js frontend, Node.js API, and PostgreSQL database, serving multiple schools from one codebase
- Implemented result computation, fee payments via Paystack, and role-based dashboards for admins, teachers, and students
- Owned architecture, deployment, and ongoing maintenance of a live, in-use production SaaS platform

Demonstrates: end-to-end ownership of a live, multi-tenant SaaS product

Hotel Management System (StayEase)

Full hotel management covering room booking, guest records, and Paystack payment integration with an admin control panel.

PHP

MySQL

JavaScript

Bootstrap

Paystack

- Built the complete system — booking flow, guest-record database, and admin control panel — for an active hotel business
- Integrated Paystack payment processing directly into the booking flow
- Delivered and maintains the system in live production use

Demonstrates: full-stack delivery for a real, operating business

EDUCATION

B.Sc. Computer Science — Federal University Gusau

- Undergraduate coursework, 2021 – Present
- Introduction to Critical Infrastructure Protection (ICIP) — OPSWAT Academy, Jun 2026
- Cybersecurity (Beginner) — TechyJaunt, accredited by ACTD, Dec 2025 – Mar 2026
- Web Development Technology — Running Jack ICT Academy, Oct 2025
- AWS Cloud Practitioner Essentials — Amazon Web Services, in progress

SOFT SKILLS

Analytical Thinking

Problem Solving

Fast Learner

Team Collaboration

Clean Code Practices

Attention to Detail
